### Section 3: Consent Given By Patient/Agent

I, the client, parent or guardian, have read or had explained to me information about the flu shot as outlined on the [Flu Shot Fact Sheet](#). I have had the chance to ask questions, and answers were given to my satisfaction. I understand the risks and benefits of receiving the flu shot. I agree to wait in the pharmacy for 15 minutes (or time recommended by the pharmacist) after getting the flu shot.

I am aware that it is possible (yet rare) to have an extreme allergic reaction to any component of the vaccine. Some serious reactions called "anaphylaxis" can be life-threatening and are deemed medical emergencies. If I experience such a reaction following vaccination, I am aware that it may require the administration of epinephrine, diphenhydramine, beta-agonists, and/or antihistamines to try to treat this reaction and that 911 will be called to provide additional assistance to the immunizer. The symptoms of an anaphylactic reaction may include but is not limited to hives, difficulty breathing, and/or swelling of the tongue, throat, and/or lips. In the event of anaphylaxis, I will receive a copy of this form containing information on emergency treatments that I had received, or a copy will be provided to my agent or EMS paramedics.

I confirm that I want to receive, or want my child 2 years of age or older to receive, the seasonal influenza vaccine

<b>PHARMACY PROFESSIONAL DECLARATION:</b> I confirm the above named patient/agent is capable of providing consent, and if written/electronic consent cannot be obtained, the patient/agent has provided verbal consent for the administration of the seasonal influenza vaccine to the patient. Based on my professional judgement, seasonal influenza vaccine should be administered to the patient.
